

Ex 3 - Write Markup with JSX

Challenge 1 of 1: Convert some HTML to JSX

This HTML was pasted into a component, but it's not valid JSX. Fix it:

App.js

Download Reset Fork

```
1 export default function Bio() {  
2   return (  
3     <>  
4       <div className="intro">  
5         <h1>Welcome to my website!</h1>  
6       </div>  
7       <p className="summary">  
8         You can find my thoughts here.  
9         <br /><br />  
10        <b>And <i>pictures</i></b> of scientists!  
11      </p>  
12    </>  
13  );  
14 }  
15
```

Welcome to my website!

You can find my thoughts here.

And *pictures* of scientists!
